

## CERTIFICATE IN CYBER INTELLIGENCE & FORENSICS

### a. Course Overview

Cyber intelligence has become critical for cyber analysts and IT professionals as it empowers organisations to predict future cyber-attacks even before they reach targeted networks which helps to prioritise responses to cyber incidents. Digital Forensics involves the application of investigation techniques on digital media to answer legal or investigative questions in relation to digital crimes. The challenge in investigating cybercrime requires that, cybercrime investigators have extensive knowledge in handling electronic evidence and advanced investigation techniques of digital devices to better consume and generate intelligence.

The Cyber Intelligence & Forensics Course is designed to equip participants with knowledge, modern hands-on skills, tools, and techniques to be able to preserve, collect, examine, analyse, and present digital evidence in a forensically sound manner which could be relied upon in any legal proceedings. The program will prepare participants to learn how to generate and evaluate courses of action to manage risks and counter system related vulnerabilities.

### a. Course Contents

- Module 1: Introduction to Cyber Intelligence & Forensics
- Module 2: Defensive & Offensive Cyber Intelligence
- Module 3: Cyber Threat Intelligence
- Module 4: Digital Forensics
- Module 5: Counterintelligence & Participant Assessment

### b. Target Participants

Law Enforcement Officials, Data Protection Officers; Information Security Officers; Cybercrime & Fraud Investigators, Network and System Administrators, IT Risk and Compliance Managers, Digital Forensics Analysts, etc.

Professionals in the security and investigations industry are encouraged to apply.
